

Case Study - Architectural

Leeds Gateway - Connect

Project Specifications

Product Specified: FTSSD25 - 25mm Stainless Steel Shanked tactile

Colour Specified: Stainless Steel grade 316 with bespoke insert colours

Sector: Architectural

Project Description

Our patented system was chosen by renowned visual artist Linda Schwab for use on her award winning design.

Over 12,000 stainless steel and bespoke coloured resin paving studs were laid in drifting, organic patterns adding ground level interest to the existing concrete pavers. The work connects walking routes through the Gateway with the City via a reflective colour palette and playful use of pattern. This project went on to win the Leeds Architectural Award 2009 for public realm landscaping.
